**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of Group I in the reply filed on 9/2/09 is acknowledged.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over L. Guild (US 755,664) in view of Yamamoto (US 5,475,910).

Re claim 1: Guild discloses piercing at least one hole in the piece of material for receiving the jewels (col. 2, lines 64-66), placing the jewels in each hole (col. 2, lines 64-66), applying a tool perpendicularly to a surface of the piece of material and close to a periphery of each hole, an end of said tool having a tip for pushing back a lip of material onto the girdle of the jewels, and forming at least one indentation comprising at least one light-reflecting facet (Figs. 1-2), except for a piece of metal and a stone.

Yamamoto discloses a piece of metal (col. 5, line 3) and a stone (col. 3, line 41).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Guild by setting a stone in a piece of metal and a stone, as taught by Yamamoto, for the purpose of providing a more lasting and expensive jewelry.

Re claims 2-3: At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to apply the tool manually and mechanically because Applicant has not disclosed that applying the tool manually and mechanically provides an advantage, is used for a particular purpose, or solves a stated problem. It is well known in the art to take a hammer or some other form of a force inducing tool or mechanism to strike or push the end of the tool as shown in Guild to apply a downward force to the surface to form an indentation to lock the jewel in its place.

Therefore, it would have been an obvious matter of design choice to modify Guild to obtain the invention as specified in claims 2-3

***Conclusion***

4. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (571) 272-4564. The examiner can normally be reached on 5:30 AM to 1:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David P. Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
